34,000 lbs. MAX

Blocking and Bracing Suggestions:

The railroads will not honor any claim if the product is not properly blocked and braced.

No voids in front and rear of unit

Floor should be lined if on slipsheets

Walls lined to protect product from rubbing

Product stretch-wrapped to the pallets

Air bags or core-filler between pallets

2 x 4's to lock pallets in place at rear

Additional information on blocking and bracing can be found on the web at:
