

Corporate Overview – Food Industry Experts

For over 25 years, Knichel Logistics has transported goods for America’s most well-known food corporations and major retailers. Specializing in intermodal, less than truckload, cross-country, and cross-border services, we have moved more than **200,000 containers with 385,000 trucks spanning over 295 million miles** over the last 5 years alone. With access to 90,000 rail containers, we work with both small and major retail distributors such as Sam’s Club, Costco, and Target to name a few.

In addition to our transportation services, we also specialize in Container Pool Management, which we currently provide to companies including Michelin and Blue Diamond Growers. Ensuring ample equipment capacity for our customers is a crucial need that Knichel Logistics provides.

Knichel also supports the federal government with recent logistical contracts for the **Federal Emergency Management Agency (FEMA)** and the **Army and Air Force Exchange Service (AAFES)**. We successfully and seamlessly navigated the complexities of transporting 300 over-dimensional FEMA units for the Paradise, CA rebuild efforts.

Knichel’s roots are deeply embedded in the food industry. Our business began by shipping rice via intermodal for mills in Northern California, and we continue those partnerships to this day. We consider ourselves experts in the transportation of Asian food products while winning awards for our performance along the way. Most recently, Knichel was named a [2024 Penske Logistics Freight Management Carrier Award Winner](#) as their Intermodal Carrier of Choice.

Current & Past Performance – Partial List

Areas of Expertise

- ✓ Intermodal Rail
