A TRUE IMC

1 of only 18 non asset IMC Providers with direct Class 1 railroad contracts

25+ YEARS EXPERIENCE

2024 INTERMODAL CARRIER OF THE YEAR

WOMAN-OWNED

SUSTAINABLE

THE VALUE OF AN IMC:

Shipment-by-shipment, building a sustainable supply chain

KnicHEL Logistics is dedicated to protecting the environment by reducing our operational footprint and helping our customers do the same. As an Intermodal Marketing Company, we understand the transportation industry's critical role in sustainability. By seamlessly integrating truck and rail services through our intermodal solutions, we offer a highly efficient and environmentally friendly way to transport goods.

Environmental Stewardship

Intermodal transportation, when compared to traditional trucking, has been proven to save up to 80% emissions leading KnicHEL Logistics to reduce 25,000 metric tons of emissions annually.

LEED certified Headquarters

Moving our headquarters to a LEED-certified building highlights our commitment to environmental responsibility.

Sustainable Partners

As a non-asset based provider, we are able to source the carrier partners you may need with EV/RNG capabilities to help you meet your sustainability goals.

ESG Commitments

We demonstrate our dedication to sustainability through programs like SmartWay and EcoVadis, earning the 2017 EPA SmartWay Excellence Award and an EcoVadis Silver Medal in 2022 and 2023.

80%
emissions savings
